

A Simple Pet Carrier from 'Chirimen Furoshiki' (Japanese wrapping cloth)

All you need is a single 'furoshiki' cloth readily to hand and within a few moments you can make a safe and effective pet carrier. Your pet will feel comfortable and secure next to you, and you will have both hands free. The ideal wrapping material is 'chirimen' crepe cloth due to its stretchy texture. Please always have a 'furoshiki' close at hand for emergencies!

Preparing your furoshiki

Tie a knot in two diagonal corners of one cloth to make a sling.

Put this around your neck and then under one armpit.

Put your pet into the sling and tie a knot with the remaining two corners.

You can let go, use your hands freely and also move about.
